| to VEE Sachsenwerk Radeberg in order to study the status of its production and development. Following are the main results of the investigation: a. Development of a television transmitter in the decimeter wave range with 3 kW power, and expandable to 10 kW power, had to be discontinued tempoderily since the required power tubes were not available. These tubes were to be provided by VEE Werk fuer Fernmeldewesen in Berlin/Oberschoenewide. Because this enterprise has been unable to deliver the required tubes, the Radeberg enterprise now is trying to obtain tubes of Western origin. The 10 kW stage of this transmitter is to be developed in VEE Werk fuer Fernmeldewesen in Berlin/Oberschoenewide. b. The Sachsenwerk was to carry out an order received from the Central Office for Research and Technology (ZAFT), of the State Flanning Commission, pertaining to the possible use of transistors for television purposes. The enterprise failed to carry out this order. The reason for this failure was the lack of skilled personnel. c. Cooperation between the Sachsenwerk and the Work Circles for Commercial Radio Devices and for Television (Arbeitkreis Kommerzielle Geraete and Indicatories Fernsehen) has not achieved the expected results. This is true if the feet that a leading technician of the Sachsenwerk, which largely disregarded the advice and propositions advanced by the two Work Circles mentioned. d. Froduction and development of the enterprise have been greatly hampered by the poor quality of components provided by other firms. VEE Gleichrichterwerk Gross Raeschen delivered to the Sachsenwerk selenium rectifiers with inverse voltages verying between 20 V and 25 V. VEE Werk | OF THE WHYPED U. S.
